

Connecting Online Faculty With Schools

SCHOOLS — Efficiently identify academically qualified, experienced online faculty. Search the database of thousands of online faculty by variables specific to distance learning such as learning management system familiarity and online teaching experience. FacultyFinder provides integrated features which allow you to save searches in folders, share search results with colleagues, and communicate with prospective faculty.

FACULTY — Create a fully searchable profile at no cost. For a nominal fee you can upgrade your membership to make your profile even more visible.

"I've used your service for several searches in the last two weeks since we started with you and I'm truly amazed at how well I can connect with good folks ready and eager to work with us. We're getting a good selection of profiles to look at with excellent credentials and teaching backgrounds. I really like how you've integrated useful tools to SAVE ME VALUABLE TIME in running a search, sharing results with others, and managing communication with prospects.

I am trying to widen the circle of recruits for my online adjunct teaching pool and FacultyFinder has helped me move in that direction quickly and without having to process lots and lots of paper and applications. We're thrilled so far and expect to be using Faculty Finder as one of the major pillars of our online faculty recruiting efforts."
